Art Unit: 1751

DETAILED ACTION

This action is responsive to applicants' request for continued examination received October 16, 2002. Claims 1-11 are currently pending, with claims 5-8 and 11 withdrawn from consideration.

Claim Objections

1. Claim 1 is objected to because of the following informalities: In line 2 of claim 1, an alkali metal is cited as a builder. An alkali metal is not a builder. It is merely a cation associated with a builder. This portion of the claim should be revised for clarity.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Harmalker et al, US 5,308,513.

Harmalker et al teach fabric conditioning aqueous liquid emulsions which are wash cycle additives for through the wash use (see abstract). An example of such a composition is a liquid emulsion containing hydroxyethylcellulose polymers and a nonionic surfactant which is added to a

Art Unit: 1751

granular detergent containing surfactants and pentasodium tripolyphosphate, sodium pyrophosphate, and sodium carbonate as builders (see examples 2 and 4). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

Applicants have traversed this rejection on the grounds that Harmalker et al do not teach the composition of examples 2 and 4 used together. The examiner directs applicants to col. 11, lines 40-42 where Harmalker et al state “*Each* of the aforementioned liquid compositions are added to control A” (emphasis added). “Each” composition includes example 2 and so the anticipatory rejection is deemed proper and is maintained.

Conclusion

4. This is a RCE of applicant's earlier Application No. 09/331818. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 1751

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Boyer whose telephone number is (703) 308-2524. The examiner can normally be reached on Monday-Friday from 8:30 AM - 5:00 PM.

If reasonable attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta, can be reached on (703) 308-4708. The fax phone number for this Group is (703) 305-3599.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
